THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric J. Franklin on 03 November 2011.

The application has been amended as follows: i) claims 47, 83 and 84 shall depend from new independent claim 81; and ii) withdrawn claims 57-80 shall be cancelled.

Allowable Subject Matter

2. Claims 43-45, 47, 49-52 and 81-86 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious the precise combination of limitations recited in independent claim 81, said limitations specifically calling for: the formation of two or more adjacent diffractive elementary gratings having a respective two or more primary colors on a substrate to produce a target color by additively mixing said two or more primary colors of said elementary gratings, wherein each of said elementary gratings is arranged to diffractively produce one of said primary colors in a predetermined viewing direction while subject to a predetermined illumination, thus ultimately rendering said selected target color in said predetermined viewing direction while subject to said predetermined illumination. The prior art cannot be reasonably combined in such a

Art Unit: 3725

manner as to meet the requirements set forth in the aforementioned limitations or Applicants' remaining dependent limitations, in a configuration such as that shown in Applicants' fig. 10 (most clearly capturing the general spirit of the claimed invention), absent the use of improper hindsight reasoning.

4. The closest prior art is U.S. Patent No. 5,956,015 to Hino ("Hino"), which generally describes a color matching system for a computer monitor wherein display signals are adjusted based upon the luminance of ambient light. One might argue that Hino implicitly discloses Applicants' general invention, given that both Hino and Applicants' claimed invention are directed to methods of generating resultant colors upon a substrate from two or more primary colors, wherein the luminance of the ambient lighting conditions is taken into consideration.

5. However, Hino fails to specifically disclose: the above referenced diffractive production of primary colors in a predetermined viewing direction. As established by Applicants in the Arguments/Remarks filed on 01 July 2011, the computer display's cathode ray tube display forms colors by fluorescence when an electron beam emitted from a cathode impinges on a fluorescent pixel, which results in the same color being present in all viewing directions, as opposed to Applicants' method, having colors diffractively produced by a grating and thus different in different viewing directions. Furthermore, Hino's grid of pixels does not provide for a plurality of grids stacked atop one another in the fashion disclosed in Applicants' fig. 10, additively mixing the selected two or more primary colors.

Art Unit: 3725

6. Examiner is aware of U.S. Patent No. 3,434,227 to Brown. Brown teaches the concept of a novel color selector, wherein two or more colors are combined in order to produce a desired resultant color, but no motivation is found to modify Hino with this reference to obtain Applicants' claimed invention, given that Brown teaches a system wherein the resultant color is the same in all viewing directions, as opposed to appearing as different in different viewing directions in the manner of Applicants' invention.

7. Examiner is also aware of U.S. Patent No. 7,355,737 to Minowa. Minowa teaches the concept of a colorization process wherein a desired printing color is achieved by combining two colors (black and another non-black color) in order to arrive at a desired resultant color, but again, no motivation is found to modify Hino with this reference to obtain Applicants' claimed invention, given that Minowa also teaches a system wherein the resultant color is the same in all viewing directions, as opposed to appearing as different in different viewing directions in the manner of Applicants' invention.

8. Examiner is further aware of U.S. Patent No. 6,084,621 to Shioya. Shioya teaches the concept of a printing method wherein recordings may be made via "color mixing," but again, no motivation is found to modify Hino with this reference to obtain Applicants' claimed invention, given that Shioya also teaches a system wherein the resultant color is the same in all viewing directions, as opposed to appearing as different in different viewing directions in the manner of Applicants' invention.

Art Unit: 3725

9. With regard to the remaining limitations that Hino fails to specifically disclose, the prior art fails to teach said remaining limitations, along with proper teaching, suggestion or motivation for making the requisite combinations without the use of improper hindsight. Furthermore, the number of additional references and the manner in which said references would be required to be modified would be strongly indicative of the use of improper hindsight reasoning.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
